

CYMPHONIX'S BANDWIDTH COMPOSER GARNERS BEST OF VARVISION AWARD

*Attendees of Industry Leading, Vendor, Reseller Event Applaud Product's
Enterprise-Class Bandwidth Management Capabilities, Ease-of-Use and Affordability*

FOR IMMEDIATE RELEASE -- October 23, 2003 – Salt Lake City, UT – In its ongoing effort to deliver affordable, yet powerful bandwidth monitoring, reporting and shaping functionality to the small and medium business market, Cymphonix Inc. announced today its flagship product, Bandwidth Composer™, was voted the Best Product: Software award by attendees of September's VARVision® event.

The invitation-only event provides a marketplace and meeting forum for technology vendors and leading Value Added Resellers (VARs). As part of the event, only a select few products are nominated for recognition in the Best of VARVision Awards program. Only the attendees can vote on which product they believe deserves to win. At the conclusion of the three-day event, attendees selected winners among some of the top names in the computer industry, including Intel Corp., Citrix, and Microsoft Corp. Cymphonix's Bandwidth Composer was selected as the best product in the software category.

Brenda Stallings, CEO of Matrix Integration, a leading solution provider headquartered in Indiana, said, "Bandwidth Composer will improve the way my clients do business. Managers who need to know how their employees are using the network can have that knowledge right at their desktop; they will be able to implement changes to how employees use the Internet on company time easily and quickly."

Eric Lesonsky, event director for VARVision added, "The solution providers in attendance represent some of the best and biggest organizations in our industry. They recommend products and services to today's high-growth marketplaces. With all of the fine products and services represented at this event, to be nominated for a Best of VARVision Award is a great achievement. To win is a tremendous accomplishment. We congratulate all of the vendors whose products and services received these honors."

About the Presentation

The award was presented at the El Capitan Theatre in Hollywood, CA by comedian Greg Proops and members of the cast of the television show “Whose Line Is It Anyway?”. Receiving the award for Cymphonix were Kevin Santiago, CEO; Kevin Asay, vice president, marketing and business development; Joe Lowry, director of sales; and Adam Lowry, director of product management. Trevor Paskett is the lead developer of the product.

“Considering the accomplishments of other vendors in attendance, many of which have multi-billion dollar research budgets, winning this award is a nice validation that our product development efforts are on track,” said Santiago. “We were told repeatedly by the solution providers that there is an immediate and compelling need for our functionality in their business accounts.”

About Bandwidth Composer

Bandwidth Composer allows management to understand at a glance who and what is using or abusing network bandwidth and to make corrections in real time through an elegant, easy-to-manage interface. The solution is unique in its ability to provide bandwidth management tools to small and medium businesses that were previously affordable only to the enterprise. Bandwidth Composer is available exclusively through the reseller channel. Pricing for the 100Mb version starts at under \$6,000.00. For more information on pricing and availability, please contact Cymphonix at (866) 511-1155 or email info@cymphonix.com.
